green™

tradition and innovation

Code: 0428.01.74

10L MANUAL KNAPSACK SPRAYER

- Lighter, comfortable, compact and ergonomic.
- Ideal for liquid application including fertilizers, herbicides, foliar fertilizers and organic products.
- Suitable for gardening, orchards, vegetable gardens, greenhouses, hotels, industries, public places and indoor disinfection.

Code: 048.02.74

7,6L COMPRESSION SPRAYER

- Equipment specially developed to provide greater comfort to the operator and greater economy of products, offering more cost-effective.
- Ideal for the application of insecticides, herbicides, foliar fertilizers, wood preservatives, cleaning products and automotive, as well as for sanitizing homes, hotels, restaurants and the similar areas.

Katu comes from the Tupian language and refers to everything that is positive and does good. The tanks of the Katu line products are manufactured with green bioplastic produced from sugar cane. Green bioplastic plastic is a renewal innovative alternative to fossil fuel derived plastics. Technology and innovation to help save our planet.

Applied only to products whose raw material is sustainable, the Katu line received the "I'm green" label from Braskem. Produced with renewable raw material, 100% recyclable, the green plastic is practically neutral with respect to CO², even when incinerated. With it, the consumer can be sure that he is buying a product that does not harm the environment.

Code: 0424.00.74
