

SOIL INJECTOR WITH METERING DEVICE

Product Code: 4575

A specially designed attachment for symmetric knapsack sprayers, for liquid agrochemicals soil application (nematicides, growth hormone, etc.), in an adjustable depth between 50 and 250 mm* (2" and 10"). Widely used in coffee, banana (to fight sigatoka), mango, citrus, grape (fruit crops in general).

Mechanism: It has an unique and safe metering system to adjust the flow rate from a minimum of 5 ml* up to a maximum of 50 ml*, per l

Lever-operated knapsack (code 7661) Flow Suppressor

This optional device is designed to improve this metering efficiency when applied in lever-operated knapsack sprayers equipped with a pressure release valve system, so increasing the working pressure.

Technical Specifications

Maximum injector depth.....	250 mm (10")*
Minimum injector depth.....	50 mm (2")*
Maximum dosage per injection	50 ml*
Minimum dosage per injection	5 ml*
(For different doses, see table below)	
Weight	1,3 kg (2.8 lb)
Single package	120x170x790 (4.7"x6.6"x31.1")

*(Approximate values for dosages and depths, which may vary according to the product or application techniques)

Use individuals or combined shims (tubes) to determine the desired metering volume, based on the table below:

Flow rate/ dose (ml)	Shim nº	Lenght (mm)
5	1	9 mm
10	2	15mm
20	1 and 2	9 + 15 mm
25	3	30 mm
35	1 and 3	9 + 30 mm
40	2 and 3	15 + 30 mm
50	4	55 mm

Spare Parts

Part	Code
1. Tip kit	4594
2. Depth limiter	4595
3. Injector rod with tip	4596
4. Hose with connector	4597

Important: Always inform the code number when ordering parts.
