Big Sucker Reversible Pump for Liquids

- 1** Pumping handle with safety transportation lock and housing for the suction and discharge trigger valve.
- 2** S4 discharge valve with lock-on device. Innovative design for safe, comfortable operation and the option for continuous (lock-on) or intermittent flow.
- 3** High yield, easy to activate reversible pressure pump.
- 4** One-touch manual flow reversal system offering fast response and high performance.
- 5** Automatic pressure relief safety valve and manual depressurization valve.
- 6** Polyethylene tank, highly resistant to a variety of chemical products.
- 7** Base support that keeps the device stable during pump activation.

Code: 11241.04.00 Vers.: 01 March/2016
